## PERSONAL PROJECTS

### Sanity.io and Next. JS ecommerce (05/2022 - 06/2022)

- I built a Custom website with Next.js and Sanity for my content management. Sanity is a platform that helps Developers to focus on developing and never about worry about file storage.
- check out the site here: [🔗](#)

### Website for PQB Company (10/2021 - 11/2020)

- I designed and Customize a website for PQB Accounting and Tax consultancy using WordPress CMS.
- Check the website here: [🔗](#)

### Coding Challenges (01/2022 - Present)

- To improve my coding skills I do coding challenges from a frontend mentor. I then submit my solutions to the frontend mentor so that other developers around the globe to review my code.
- check out GitHub repo: [🔗](#)

### Portfolio Website (08/2022 - 09/2022)

- I built my personal website Where I showcase my completed projects.
- check out website here: [🔗](#)
